

Landscape Design Information

Send information to sales@settlemyrenursery.com with the subject line Landscape Design

Option 1: Sketch-and-Go!

Fast and Free, Same Day Option

We use pictures of your landscape to sketch a quick landscape design while we walk around the nursery with you to determine what plants you like and would work well in your space. You take your new plants and landscape design sketch home the very same day. For this option, we prefer to schedule an appointment and have pictures and measurements beforehand, but it is not necessary. This option is great for a quick design or for updating a new or existing bed.

Option 2: Scaled Drawings

Scaled Drawings starting at \$295.00

The scaled drawing is great for homeowners who would like a more detailed drawing than we can offer with our free sketch-and-go service. These drawings are done to-scale by our trained landscape designers here at the nursery. Your drawing will include an overhead placement diagram with a key. On-site landscape consultations* are available and may be needed for this service.

Option 3: Digital Renderings

Starting at \$595.00

For our most detailed landscape design, we recommend the computer rendering option. Our landscape designers upload photos of your house/landscape into our computer software and produce a digital rendering of your landscape with mature plants. This option begins at \$595 for one frame and includes up to three edits to ensure the plants and layout are exactly what you want. With this option you'll be able to see what your landscape will look like in 2-3 years when the plants reach maturity. Additional digital rendering frames along with pricing can be discussed at time of service. On-site landscape consultations* are highly recommended for this option.

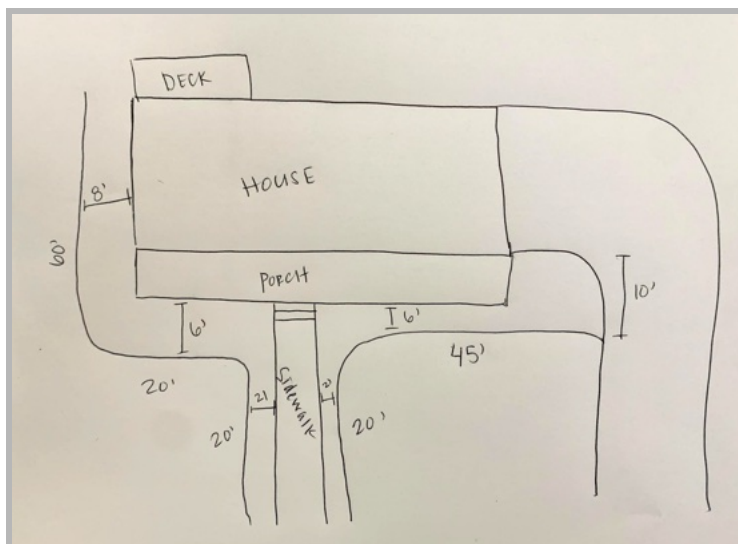

***On-site consultations:** We will come to your property, discuss goals and expectations, and take measurements and photos of the area. On site consultation rates begin at \$195. For availability and scheduling , please contact the office at: (828) 874-0679 or by email at: sales@settlemyrenursery.com

Landscape Design Requirements on Next Page

Requirements

No matter which option you choose, to get the best results from our landscape design services, we need the following information:

- Address, phone number, and email address
- Full picture of house or landscape to be designed (example below)
- Close pictures of beds, crevices, or areas to be designed
- Length and depth of beds or planting space (example below)
- Sun exposure
- Any other pertinent information (height of windows, water spigot location, drainage issues, trees not pictured that may cause more shade in the area, etc.)
